

Paradigms Final Deliverable

Ben Merrick & Jack Stump

Vision Statement:

Flip the Senate provides a place for people to come and learn about Senatorial candidates in some of the most important races for this upcoming election. Users can interact by liking their favorite candidates, learn a bit about their background, and see where they are from!

Architecture:

User Guide:

The overall user guide of the website is extremely simple. Upon loading the base url of "student04.cse.nd.edu:51020" the user is prompted with the custom splash screen as shown below in figure 1. Here, the user is shown the website's logo and progress bar as it "loads" the information and automatically directs you to the home page of url "student04.../home". Figure 2 depicts the home page where the user is shown the title of the website, an image, and the navigation bar at the top with buttons as links. The buttons redirect you to one of four Democratic candidates running for the Senate, a Zoom call with all of the candidates, a map of the candidate's location, or back to the home page.

Figure 2. Home Page

If the user wishes to view one of the four candidates, they simply click one of the four buttons on the top with the name of the candidate they wish to see. The candidate's page loads and provides the information relevant to that particular candidate. For example, figure 3 shows the page of Amy McGrath. The user can view her name at the top of the card, the number of virtual votes she has, her picture, a biography, and a button to show your support and vote for her. When clicking the "Vote Amy!" button, the number of online votes will increase by one and the page is refreshed. This general layout applies to the rest of the candidates as shown in figures 3, 4, and 5.

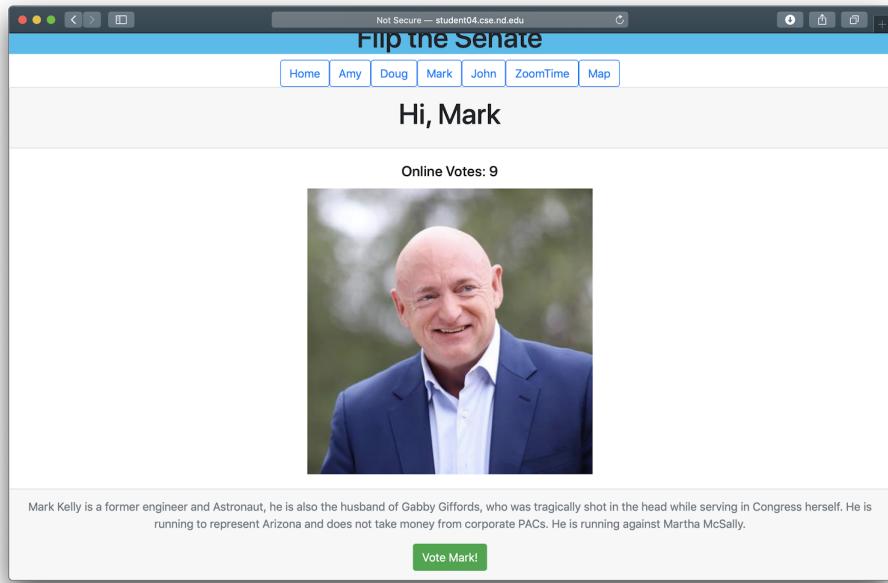

Figure 4. Mark Kelly Page

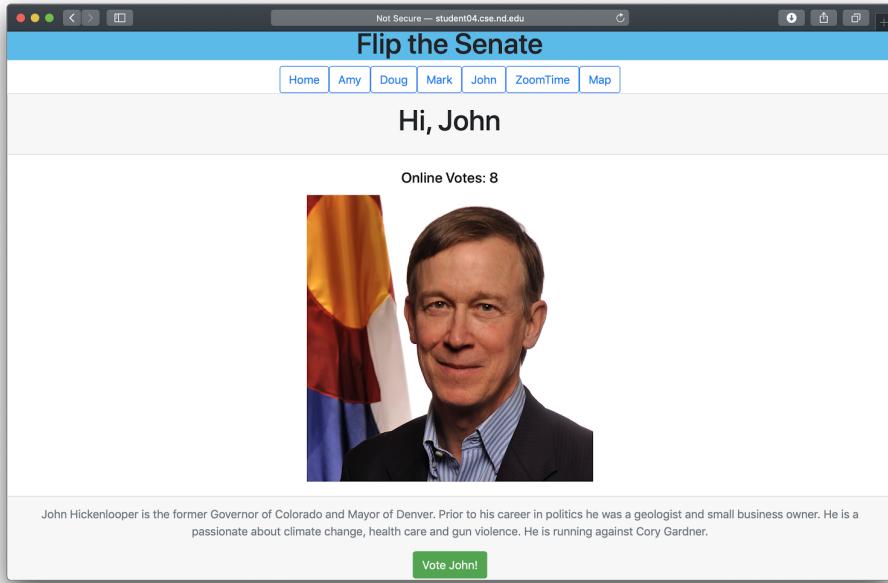

Figure 5. John Hickenlooper Page

Next, if the user wishes to view the Zoom call between all four candidates, they can click on the "ZoomTime" button and will be redirected to the zoom meeting. For fun and appearance, we styled the background to look like a basic zoom call! The buttons at the bottom of the page are simply for show. The user can view all four candidates in a zoom call style display as shown below in figure 6.

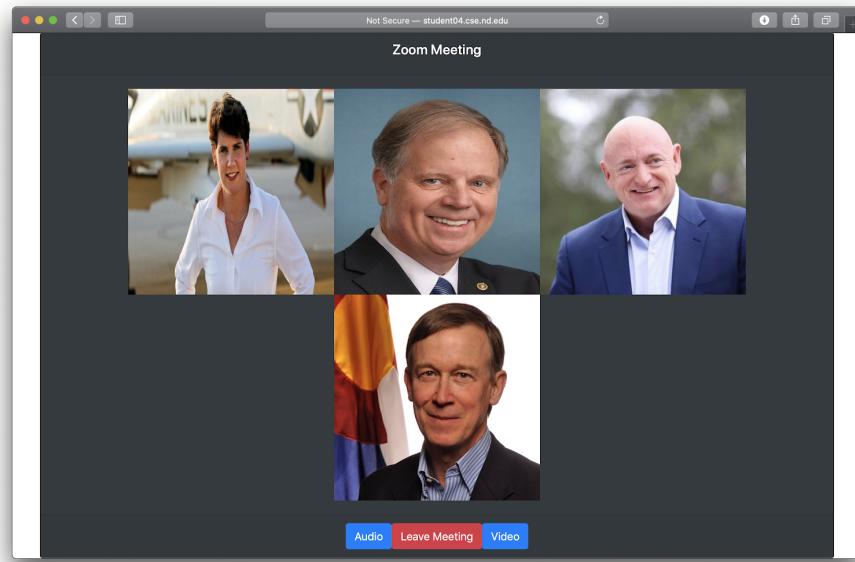

Figure 6. Zoom Call

The final piece to the website is the “Map” button. This final button brings the user to a google map showing the location of all of the candidates in the United States. Obviously, there is not much interaction here as we did not pay for full functionality and use as stated not to do in class. The view of the map is shown in figure 7.
